**Assessment/Plan**

1. Body mass index [BMI] 36.0-36.9, adult

51 Years-old Male presents for weight management follow-up.

Initial weight: 118 kg and BMI of 38.82 (Nov 2024)

Current weight: 102.5 kg/226 lb (previously 112 kg in Feb 2025)

Current medication: Wegovy 1 mg weekly, well-tolerated without significant side effects.

Pt has noticed his weight has been stagnant over the last 3-4 months but continues to achieve 10k+ steps daily, exercises 5 times weekly.

**Plan:**

- Increase to Wegovy 1.7 mg weekly
- Reinforce lifestyle modifications, including a healthy diet and regular exercise
- Follow up in 1 month (in person)
- Alternate between face-to-face and virtual visits monthly
- No gap refills if appointments are missed

Patient has been advised to call 911 or visit the nearest emergency room/urgent care for any urgent or emergent concerns. For other inquiries, they can call 702-653-2273 and leave a message with the clinic. Patient may also use MHS Genesis at <https://patientportal.mhsgenesis.health.mil/> to message the PCM team.

Grace L. Par, MD, Capt, USAF, MC.

Staff physician, Family Health Clinic

Mike O'Callaghan Medical Center/ 99th Medical Group

Nellis AFB, NV

**AUDIO TELEHEALTH ENCOUNTER:** The patient's appointment today was either considered suitable for telehealth or scheduled at the patient's request. Telehealth helps minimize infection exposure, especially for high-risk patients, and improves access to care. While a physical exam was not necessary for this consultation, medical decision-making may be limited, and an in-person follow-up may be required at the provider's discretion. The patient (or guardian) has been informed of the benefits and limitations of virtual care, understands their right to in-person care, and verbally consents to proceed with telehealth. The patient's name and date of birth were verified, and medication reconciliation was performed.

Total time spent discussing and reviewing the patient's medical records, lab results, and documentation: 10 minutes.

Billing is based on both the time spent and the complexity of the patient's concerns.

**Problem List/Past Medical History****Ongoing**

- Anxiety
- Benign paroxysmal positional vertigo
- Body mass index [BMI] 36.0-36.9, adult
- Chronic sinusitis

## Office and Clinic Notes

### History of Present Illness

Virtual follow-up for Wegovy. Patient recently returned from a cruise but still reports a 5-8 pounds weight loss over the past month. Tolerating medication well and requests a dose increase. No other question/concern.

### Review of Systems

No fever, chills, chest pain, shortness of breath, abdominal pain, or urinary symptoms. No recent weight changes. Denies fatigue or weakness.

#### Pain

No qualifying data available.

### Physical Exam

Patient exhibited a normal speech with no audible respiratory distress. A physical exam was not performed due to the virtual nature of the visit. The patient understands the limitations of telehealth and has the option for an in-person evaluation if needed.
